

Sahab Landscape Lawn Edging

Design

The edging designed to be easily attached with next piece of edging.

Lengths

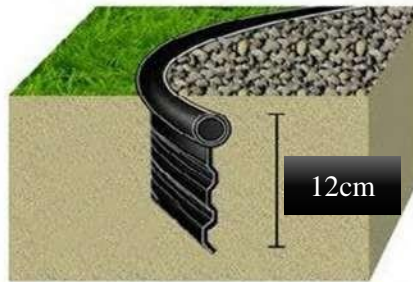

We produce the edgings in two different lengths (5.5m & 5.85m) to make it suitable for different customer requirements. Sometimes we produce other lengths depending on the customer need.

Uses

There are many different uses of garden plastic edging like preventing plants & grass from spreading. It also can be used to separate different horizontal layers like (soils, aggregates, stones ...etc.)

- The edging is perfect for keeping grass from spreading, making borders around planting beds.
- Flexible and easy to install as the required shape.
- Made of HDPE (High Density Polyethylene).
- Also suitable for creating raised layers of mulch, rocks, or soil.
